## OBJECTIVE

Seeking a full-time position in the IT industry, working in web development and usability.

## EXPERIENCE

### Web Developer, CompanySite.com
October 2006 – Present
**Company Name**, City, State

Create, update, and maintain site pages for WebsiteName.com, using CSS, HTML, JavaScript, and XML/XSL. Coordinate with producers and designers for major site changes. Maintain internal tools for managing site structure, news data, and sports photos, using Perl and Java. Work with third-party providers to ingest and integrate external sports data, and generate content feeds for use on partner web sites. Assist with design efforts for site pages, content archival, photo galleries, video features, mobile WAP site, and third-party gadgets. Provide technical support for usability issues and critical site problems, as needed.

### Freelance Web Designer
September 2005 – August 2007
**Company Name**, City, State

Lead designer and developer for web sites and promotional media for small businesses. Utilized contemporary design to create concise web sites for specific client needs. Site creation included use of CSS, HTML, JavaScript, MySQL, Adobe Flash, Swish Max, PHP, online payment features, and form processing. Created and assembled web graphics, including logos and advertisements. Designed email blasts and newsletters for site launches and event announcements.
*Portfolio available at **http://www.yourdomain.com/portfolio**.*

### Java Programmer
March 2004 – October 2006
**Company Name**, City, State

Worked on team to develop next-gen prototype internal web portal, integrating several legacy sales/forecasting tools into a single application. Created Java-based portlets and Java Server Pages (JSPs) to build a unified user experience. Used software suite to implement a document catalog, for storing and tagging thousands of user-generated reports. Used company standards for interface coding. Extensive use of Java, AJAX/JavaScript, SQL, and Unix shell scripting required. Assisted with proof-of-concept reviews and stress testing.

### Lead Technical Analyst, I/T Specialist
March 2002 – March 2004
**Company Name**, City, State

Primary technical contact for critical issues for a global application used for opportunity management and global sales forecasting. Served as lead over team of six analysts located in other countries. Tasks included resolving technical failures in a timely manner, automating application monitoring tools, and providing technical expertise for application upgrades. Prepared technical training and process documentation for team, to aid with day-to-day support issues. In-depth knowledge of UNIX and database systems required.
